

**Doug Neves**

8171 S Algonquian Circle  
Aurora, Colorado

My desire is to become a Board Member for the Eagle Bend Metro District, to equally represent all of the communities within the the authority of this District.

I spent 26 years as an elected Board of Director member for the Parker Water and Sanitation District in Parker Colorado. For 20 plus years I held the position of Board President.

During my time with the District, I assisted in leading the way of a service provider to 2,800 residents to near 75,000 residents.

Taking a District that was outdated and inadequate to modern state of the art provider.

Spent 20 years proving the need and benefit of building a \$200 million reservoir project, now known as the Ruetter Hess Reservoir. This project will provide water long into the future for Parker, Castle Rock Castle Pines North as well as others.

Lead the study proving to the State of Colorado that the quantity of water in the aquifers was far less than previously predicted. The new projections are now the standard.

During my tenure I also held positions with my local HOA and involved with multiple youth sports organizations.

On a personal note, we have lived in Colorado since 1985 and have lived in Heritage Eagle Bend for the past four years. All of my children remain in Colorado, none of us has the intention of ever leaving this wonderful state.

I held a Senior Management position for a top 100 world wide company for 39 years, managing Sales and Marketing Global Teams in ten different countries.

I believe that with my experience I can be an additional asset to Eagle Bend Metro District.
